**Subject:** RE: Crown Castle Fiber internet proposal to 1 Tuxedo Park Road

Hi Mayor,

You could do that but it may be hard to justify the \$300k+ build costs between just these 2 sites since we still have to build fiber to the South gate.

What I am recommending is that we bring in one large dedicated internet service to say Village Hall and then create the intranet (or ELAN) to all of the other Village sites using this fiber build. The other sites can then share from this large pipe of bandwidth in whatever way the Village chooses.

This would spread out the build cost amongst all sites and help bring down whatever the monthly charges would be for us to build the fiber network. If there is ARPA funding or other funds to help offset these build costs, even better.

The other benefit to this is that the more sites you have in the Village serviced by fiber it would then make it easier to improve cell coverage either using small cell or other third party solutions.

Please email or call me with any other questions or comments. I would be happy to set up a call to review in more detail and clarify.

Thanks and best regards,

Hi Grant,

Are you suggesting we could run the fiber to the police station at the main gate and then set up an intranet connection to the south gate?

**Subject:** RE: Crown Castle Fiber internet proposal to 1 Tuxedo Park Road

Hi John,

I hope you are well and that you all enjoyed the holidays.

We have taken a look at the build to get to the South gate location. As you know we have provided a proposal to get internet service to the 1 Tuxedo Rd location previously.

See attached for what this build would look like and in particular along with the rest of the Village's locations you had provided earlier. The build we discussed to get to the Village Hall/Tuxedo Club is shown in green. The ongoing build to the South gate is shown in yellow.

The total build (green/yellow path) to get services to this South gate would be in the neighborhood of \$300k. This total is not taking into account any of the build from Long Meadow Road to the school and then onward to the Village Hall/Tuxedo Club location we discussed that would provide redundancy. Given this we feel the monthly costs to provide this service to the South gate would be out of bounds from a budget perspective.

We believe it would make more sense to build to all of the Village sites listed and provide a network between these Village sites. The separate internet service to the Tuxedo Club would help the overall build costs of the green path from Route 17 to the Village Hall/Tuxedo Club location.

If you would like us to put something together to look at in more detail, please let me know. I would be glad to put some options together for you to look at. It would also be helpful to know if any ARPA funds (or other funds) would be put towards any of this build cost.

Please email or call with any comments or questions. I am happy to discuss this further or set up a call to review.

Thanks and best regards,

Preston,

I do not know if anyone else has chimed in but for clarification the VTP Police Dept. monitors what is known as the South Gate. The official address is 460 South Gate Rd. Using the internet, the Police Dept. located at 1 Tuxedo Rd., operate gate access, voice communications, and real time video at 460 South Gate Rd. For improved communications we would need fiber optic service at both 1 Tuxedo Rd. and 460 South Gate Rd. Please prepare an estimate and send it to us.

Regards,

John Ledwith

Hi Mayor,

Please find attached a proposal to deliver a 500 x 500 Mbps dedicated internet connection using our private fiber optic network to 1 Tuxedo Park Rd. Let me know if you have any questions upon review.

Also I forgot to ask this yesterday but does the Village use an IT vendor for servicing connections and equipment? If so could you provide that name and contact info and confirm we might set up a call with them to discuss certain aspects of this ongoing larger project?

Thanks and best regards,

Hi Preston,

Thank you. For starters please send me a quote for connecting the police station to the Rt 17 corridor as this is independent of the others. The requirement initially is 500 over 500 and it should be the primary source of internet with a failover to our existing Cablevision. Also, I can help with the communications and permitting from O&R because a former CEO is located here.

Mayor

Hi Tinka,

I agree.

All,

Please accept this meeting invite if the time works for you. The login link is below.

We will be prepared to share information on the fiber build options and details on moving forward once we gather some more information on what specific services each entity and site needs for internet services using this fiber optic network.

Thanks,

Grant

Hello everyone,

We have some more information together now and would like to arrange a meeting to review this in person if possible. Would Monday the 25<sup>th</sup> or Wednesday the 27<sup>th</sup> work for your schedules? I would like to have representation from the Village, the Club and the school if possible.

Please confirm which day would work. We are available any time after 10am EST.

Thanks and best regards,

Hi Sheila,

Thanks again for your time this morning. We appreciated your input into this project and look forward to working with you moving forward.

As discussed attached are some images of the potential fiber build coming from the North into the Village. This would be the long dark blue line from the North from our exiting fiber on Route 17 and then building into the Village and Club (shown in pink). We could then extend this to the School via the light blue line going West.

We can look into providing redundancy on this network by building to the School from the West to East (or some other way) and connecting to the Village and Club. This would allow for services to remain uninterrupted if there is an act of God, etc. that brings down power lines and/or our fiber from either direction. This of course would increase the cost of the fiber build but it is certainly something we can look into to provide more details. As you can see from the Overview image we have fiber surrounding the roads encircling the area.

We can also assist with a separate project by working on the DAS (Distributed Antenna System) to improve cellular service in the area. We will work on this our Carrier group to see if there are providers interested in providing cellular service in the area and we can use small antennas throughout the area to broadcast this instead of large cell towers which may be an eyesore to residents. These small antennas could be placed on the Club roof, water tower, etc to provide improved coverage for cell calls in emergencies.

We will work on the redundancy solution as well as contact our Carrier group to start looking into the DAS solution in more detail. As I said I think having the fiber built into the Village already will be a huge benefit for having cellular carriers interested in providing services in the area.

We will be back in touch soon with more details so that we can get everyone involved moving forward on this project. Be well and talk soon.

Thanks and best regards,

Hi Sheila,

Sorry for the delay but I have been travelling.

The funding cannot be reversed/reduced and the build time from project start to finish would be about 3-6 months depending on other work in the area and the pole applications we would need to apply for with Orange & Rockland. I would always rather have more time than less in these projects so the sooner we can meet, the better.

I am waiting to hear on availability with the Village and school office before I can schedule this potential meeting.

Thanks and best regards,

**Subject:** RE: Meeting request re: Crown Castle Fiber / Tuxedo Club, Tuxedo Park School, Village of Tuxedo Park

Dear Grant,

First, forgiven me as this is my first dealings on a government level matter and my questions may be naïve.

Three years seem like quite a bit of time but I have learned on large scale projects that time seems to slip away. In your professional opinion, if all goes smoothly, from this point of preliminary conversations to completion how long would a build out like this take? Ballpark is fine.

Also, Is there the potential for the whomever has the Presidency in 2024 to remove/reduce/reverse this funding?

I know I am probably getting ahead of the conversation but I just wanted to make sure we, as a group, understand that time might be of the essence regarding this particular topic.

Sincerely,

Sheila E. Kobrick, MBA, CHAE

**Subject:** RE: Meeting request re: Crown Castle Fiber / Tuxedo Club, Tuxedo Park School, Village of Tuxedo Park

Hi Sheila,

Here is a link for some more info on ARPA. [ARPA Local Relief Frequently Asked Questions - National League of Cities \(nlc.org\)](https://www.nlc.org/arpa-local-relief-frequently-asked-questions) and here is a link to a FAQ about funding etc: [ARP State and Local Fiscal Recovery Funds Information Sheet FINAL.pdf \(senate.gov\)](https://www.senate.gov/legislative/finance/arpa-state-and-local-fiscal-recovery-funds-information-sheet-final.pdf).

### **Is there a deadline to use the funds?**

Funds do not have to be obligated until December 31, 2024, and unexpended funds are not subject to recapture or return until December 31, 2026.

This is use it or lose it funding so it would be great to use this for infrastructure improvements.

Thanks and best regards,

**Grant Preston**

Paola,

No problem! Enjoy your time away.

Hello Mayor McFadden and John,

Are you available on the 1<sup>st</sup> of October to meet on site with myself and our engineer? We would like to talk about fiber service options to each site and perhaps do a quick site visit to the school, club and Village office.

Thanks and best regards,

Good afternoon all,

We have been able to pull together costing for the fiber build to the Village, Club and School and now would like to schedule one single meeting with all interested entities to review the needs and options for potential services to each site. While we are there it would be beneficial if we could include a site visit to each location with our engineer.

Could you please send me some available dates and times that we can accomplish this? To make things a bit easier, we have availability on the 24<sup>th</sup> and 30<sup>th</sup> of September as well October 1<sup>st</sup>. Would any of these dates work and if so when/where?

Thanks in advance for letting us know your availability by next Wednesday the 22nd.

Thanks and best regards,

Hello Mayor McFadden,

I trust all is well.

Let me know if you would like to set up a time to discuss this potential project either in person or over the phone. I would be glad to set aside time and gather internal resources to look at this project and discuss funding sources to help finance this including the American Rescue Plan.

As you may know we provide fiber optic internet and networking services to small to large enterprise customers and municipalities all over the Country. I am sure we can help improve services there for not just the Village but the school las well as the Tuxedo Club.

I look forward to hearing from you.

Thanks and best regards,

**Grant Preston**

Good morning everyone,

I'd like to introduce myself as the new Account Executive for the Village of Tuxedo Park here at Crown Castle. Terry Flood and I spoke about the project you are looking into to potentially provide fiber optic network into the Village as well as potentially The Tuxedo Club and School nearby.

I am hoping we could schedule a meeting to discuss this further. If you have some availability on the next week or two please let me know. I would be happy to arrange a meeting to discuss this further with any interested parties.

Thanks and best regards,

On Mar 31, 2021, at 4:01 PM, Flood, Terry <[Terry.Flood@crowncastle.com](mailto:Terry.Flood@crowncastle.com)> wrote:

Good Afternoon Paola,

I hope all is well and you, your family and team are safe and healthy.

Things have been crazy to say the least since we last spoke along with Sheila Kubrick from the Tuxedo Club.

I left FirstLight Fiber back in November and joined Crown Castle. Crown Castle is also a fiber provider in the area with a much more dense fiber network and a stellar reputation for quality and service.

I am the Commercial Account Executive for Crown Castle Fiber in the NYC, Westchester, Hudson Valley, CT markets. . Crown Castle Fiber is an active member and working very closely with the Orange County Partnership for Economic Development to help bring high speed fiber optic internet broadband to businesses in the county.

We provide ultra-low-latency fiber connectivity for businesses in the area such as yours. We can offer a comprehensive portfolio of services, including Internet, voice, managed security, DDoS protection, cloud connectivity and colocation solutions. Crown Castle is one of the fastest growing fiber providers in the northeast and we maintain a local presence and 24/7 support.

Crown Castle has a very extensive fiber network throughout the area and is 100% owned and operated by Crown Castle. Some of Crown Castle’s larger clients in the area include The Center for Discovery, Orange County Government, Sullivan BOCES, Lego Land, Amy’s Kitchen, Orange Regional Medical Center ( Garnet Health )to name a few.

The great news is our fiber service is in the same area as when I quoted out services for you last year which would make servicing your client’s businesses no different in terms of building the fiber to your building.

With more companies relying on cloud-based applications to run their business and the need to support teleworkers, it is even more critical to have a reliable/scalable fiber network. Our services are delivered over our 100% owned and operated 80,000 route mile fiber network which allows us to tailor solutions to meet your needs and to optimize our network to your benefit. We are one of the only companies that can truly offer end-to-end quality Fiber connectivity backed by industry-leading SLAs.

I know you we working with Sheila and team on bringing together the Tuxedo Park School as well as the Village. I would welcome 15 min of your time to go through where the project stands currently and see if we can discuss in more detail Crown Castle and what we can offer. Please let me know what day/time works best for you to have a quick chat regarding our products and services.

Thank you and I look forward to speaking with you.  
Be well.
