Report from the Wee Wah Park Committee

Regarding Wee Wah Park, we are collecting three bids from professional aquatic management companies for co-management consideration. All three offer lifeguard services, safety zones, rescue audits, scheduling, programming and event registration, cleaning checks, maintenance, and repair status. We intended to seek a co-management proposal from the WWBC but were surprised to learn that they submitted a lease proposal for the 2022 season, indicating they are not interested in a co-management proposal. We are also in the process of looking at new designs for the Park. We have two highly qualified landscape design-build firms that are very excited to have the opportunity to be involved in such a beautiful project. We are expecting preliminary design concept drawings within a few months. With Board approval, we intend to choose a winner for the Park design and request taxpayer funding for a detailed design and renderings. In addition, we plan to begin our fundraising efforts soon and keep the Board and community apprised of our progress.
